

RIGID PAD™ FILTER

WITH SPOR-AX® ANTIMICROBIAL

MERV 6 (EQUIVALENT TO G3)

CUT TO SIZE AND USE

The Fiber Bond Rigid Pad, as its name implies is a master sheet of rigid synthetic filtration media. Simply cut the quantity needed to the required size and install - - "The Instant Filter".

SECURITY OF RIGID PAD DURABILITY

When custom size one inch filters are needed the choices have been either a flimsy, low efficiency glass throw-away or expensive custom made one inch pleat.

Now, the Fiber Bond Rigid Pad is available, combining strength, performance and economy.

NO MOULD GROWTH ON THE MEDIA

Spor-Ax antimicrobial is a biocide that effectively controls growth of mold, mildew, algae and fungi on the media. Mold growing in a filter media will increase resistance, reducing service life.

WHY THE RIGID PAD?

- 100% FILTERING AREA
- CUT TO SIZE AND USE
- THE INSTANT FILTER
- SPOR-AX® ANTIMICROBIAL
- MERV 6 (G3 EQUIVALENT)
- UPGRADE FILTRATION OVER ANY TYPE THROW-WAY

APPLICATIONS

Used in commercial and industrial air filtration systems. When clean air is important.
